NORTHERN SEA ROUTE INFORMATION OFFICE PROVIDES PRACTICAL INFORMATION ON SHIPPING AND LOGISTICS ALONG THE NSR

The opening ceremony of the Information Office took place in April 2011 in Kirkenes, Norway.

The NSR Information Office is owned and operated by the Centre for High North Logistics (CHNL). The office was established as a joint initiative in April 2011 between CHNL and Rosatomflot, with additional financial support coming from Norwegian Barents Secretariat. Main office is located in Kirkenes, Northern Norway with branch office in Murmansk, Russia.

Our objective is to provide businesses and international organizations with relevant practical information in English for planning and arranging transit voyages on the Northern Sea Route (NSR). Most of our information is collected from various Russian sources, including the new NSR Administration in Moscow.

NSR Information Office's website, www.arctic-lio.com, was launched at the 8th Annual Arctic Shipping Forum in Helsinki, Finland, April 25th, 2012, in front of 300 experts on Arctic shipping and logistics. We believe it is crucial to have reliable information in English available for a wide range of potential NSR users.
